Juha Gröhn, CEO

“Atria’s net sales have increased during the first half of the year, and profits have improved compared to last year. The growth is based on both organic growth and on acquired operations. The strategy of healthy growth is being implemented, and it is especially delightful that net sales have grown in all business areas.

Atria's profits increased in Q2 in Finland, the Baltic countries, and Russia. In part, this has been influenced by the recuperation of the meat market, but also by our modernised product line and the successful execution of several projects improving productivity. In Estonia, production was centralised at a single plant last year. In Finland, the investment in the Nurmo pig cutting plant is at its final phase, and the plant's performance was significantly improved during the spring. The Russian meat product market situation has improved slightly, and the Sibylla concept continues to grow.

Scandinavian profits fell short of last year's levels. This was caused by increases in raw material costs and the costs incurred in taking over poultry operations. Investments at the poultry plant proceed according to plans.

Pork exports to China have begun, and the first shipments of meat from the Atria Nurmo plant arrived in China at the end of June. The demand is good, and the previously estimated amount of 3 million kilos during this year will most likely be surpassed.”

April-June 2017

Atria Group's net sales for April-June totalled EUR 368.4 million (EUR 341.3 million). EBIT amounted to EUR 10.0 million (EUR 6.1 million). Net sales increased in all business areas. Sales volumes grew in all business areas. The acquisitions made in Finland and Sweden also supported growth. The positive development of EBIT was due to the better profitability in the business areas of Finland, Russia and the Baltic countries. The sales structure was better than during the corresponding period last year. High production costs at the poultry unit weighed down Atria Scandinavia's EBIT.

Atria Plc donated a total of EUR 60,000 to two Finnish universities and a fund for higher education. The University of Eastern Finland, the University of Vaasa and the South Ostrobothnian University Fund received EUR 20,000 each.

Atria will build the largest solar power park in Finland at the Atria Nurmo production plant, in co-operation with Nurmon Aurinko Oy. The construction of the first phase of the project, partly financed by the Finnish Ministry of Economic Affairs and Employment, started at the beginning of June. The first sections of the power park will be connected to the power grid by the end of July. Ground-mounted 4 MWh solar panel fields will be built by autumn. INTERIM REPORT ACCOUNTING PRINCIPLES

This interim report has been prepared in accordance with the IAS 34 Interim Financial Reporting standard. Atria has applied the same principles in preparing this interim report as in preparing the 2016 financial statements. However, as of 1 January 2017, the Group uses new or revised IFRS standards and IFRIC interpretations published by the IASB, included in the accounting principles of the 2016 financial statements. None of these new or revised standards or interpretations had any impact on the figures presented for the period under review.

IFRS 15, Revenue from Contracts with Customers, will enter into force on 1 January 2018. The new standard will replace the current IAS 11 and IAS 18 revenue recognition standards and related interpretations. Atria Group has assessed the effects of IFRS 15 over the course of 2016 and 2017. According to a final report received by the Board of Directors in March, the implementation of the standard has no significant impact on the Group's income statement, balance sheet or cash flow. The majority of the Group's customer contracts are about the sales of food products. Delivery is usually made within 24 hours, and control is transferred upon delivery. Customer contracts and Group-level instructions have been checked over. Processes or systems will not need to be changed. Atria will continue to assess the disclosure requirements under the revised IFRS.

IFRS 9, Financial Instruments, will be implemented 1 January 2018. The standard is mainly applied to the disclosure requirements of Atria Group. As for electricity derivatives, IFRS 9 will cause changes in hedge accounting. The impact of these changes is being investigated.

IFRS 16, Leases, will be implemented 1 January 2019. The IFRS 16 standard will change the methods of lease accounting in Atria so that all leases, apart from low-value and short-term leases, are recognised in the balance sheet as assets and as assets corresponding to the lease payment obligation. The standard also affects the profit levels of the income statement and key indicators, and it will increase disclosure requirements. Atria has begun preparing for the implementation, and lease contract information is currently being gathered from subsidiaries. The exact effect of the standard will be evaluated during the end of the year, but it is to be assumed that changes will not be significant.

The principles for calculating the indicators were set out in the 2016 financial statements. In the company's view, the indicators presented serve to clarify the view provided by the income statement and balance sheet of the business' operational result and financial position.

The figures presented in the release are rounded to EUR million, which is why the combined total of individual figures may differ from the total sum presented. The figures in this interim report are unaudited.
